

# THE BLAIRMORE ENTERPRISE

VOL. XXXV, No. 47.

THE BLAIRMORE ENTERPRISE. FRIDAY, NOVEMBER 24, 1944.

\$2.00 PER ANNUM.

"Serve the Church that the Church May Serve You."

**CENTRAL UNITED CHURCH**  
BLAIRMORE

Rev. James McKelvey, Minister

Services Sunday next:  
11.00 a.m., Senior school.  
2.00 p.m., Junior school.  
7.30 p.m., Public Worship.

**ST. LUKE'S CHURCH, BLAIRMORE**  
Rector: Rev. W. E. Brown

The Sunday next before Advent—  
Matins 11 a.m.

Sunday School 12 noon.

Thursday: War Intercession 7.30 p.m.  
There will be choir practice immediately after this service.

Reader: Your presence and help will be greatly appreciated at the big bazaar by the St. Luke's Ladies' Guild, to be held in the Olive hall, Dec. 2nd, from 3 to 6 p.m. Come, help and encourage the ladies in their good work.

**SALVATION ARMY, COLEMAN**  
Lieuts. S. Nahrney and R. Hammond, Officers in charge.

Sunday services:

11 a.m., Holiness meeting.

2.30 p.m., Directory class.

3 p.m., Sunday school.

7.30 p.m., Salvation Meeting.

Tuesday: 7.30 p.m., Red Shield Auxiliary and Home League.

Thursday: 5 p.m., Fraise Meeting.

Funerals and obsequies on application to the local office.

**BELLEVUE BAPTIST CHURCH**  
Pastor Evangelist: Alfred Siple

10.30 a.m., Sunday school.

11.30 a.m., Morning service.

We preach the Victory Life of Christ, and invite you.

**HILLCREST UNITED CHURCH:**  
Services every Sunday at 3 p.m.

**BELLEVUE UNITED CHURCH:**  
Services at 7.30 p.m. every Sunday.

**COWLEY UNITED CHURCH:**  
Services alternate Sunday mornings at 11 o'clock.

Rev. W. H. IRWIN, Minister.

The interior of the United Church has been enduring the attack by Pete Giacullo, who has been making a wonderful improvement to the top and side walls. When it comes down to fine work, Pete is one of those guys who deservingly refuses to be shown.

## New "JAVA SHOP" Opens

FORMERLY COLOMBO'S COFFEE SHOP  
UNDER NEW MANAGEMENT

The new JAVA SHOP on Main Street, Blairmore, just east of Cosmopolitan Hotel, will be open for business today

The premises, previously occupied by Mr. P. Colombo, have been thoroughly renovated and considerable changes made, so that they are without a doubt the most attractive in The Pass

— Open Hours 9 a.m. till ? —

**SPECIAL FEATURES**  
LIGHT LUNCHES - ICE CREAM - SOFT DRINKS  
and CONFECTIONS

MRS. J. RIVA, PROPRIETRESS

### THE THREE GREAT POWERS

D-Day unleashed a flood of predictions of when the war will end. One fellow says, "The New Year," another "next summer," yet another sets the date in 1946. Last week in London, Prime Minister Churchill warned that it will take "the full exertions of the three powers (the British Empire, United States and Russia); every scrap they can give to crush down the desperate resistance which we must expect from this military antagonist at last beaten back to his lair."

The "three great powers" are made up of every last man, woman and child living in all those countries. It may not always be easy to see how individual lives affect the outcome of the war, but it is unquestionably our individual effort that makes up the united effort of the whole. We back up Canada by buying war bonds and certificates, and by accepting the restrictions of the government with our best grace. But what about the way we live in our homes and conduct our business? Divided homes can't back a war one hundred per cent.

Take the question of appeasement—when it happens between countries we have seen that war is the pay-off. We are quick to recognize and criticize appeasement in our leaders, but what about appeasement in our homes? Appasement—letting things slide and doing a second-rate job—creates division and resentment wherever it is.

Constant criticism in a home saps the family of its ability to work together and to face the world as responsible people. In the nation it is just the same. It makes one group superior to another, while both groups look out for their own interests instead of the good of the whole country. Appreciation and encouragement in home and country send people out willing to go the whole way, willing to give their very best for someone else's good. In the years ahead Canada must stand united or she will fall prey to the tims that are seeking to gain power for themselves.

If we expect "the Government" or "George" to do the job of winning the war—it won't be done, for in Canada "the Government" or "George" are just everyone of us. And back of all our fighting men must stand people who are willing to put aside all plans for personal security and advancement, ready to absorb the shock of battle and carry through to total victory.

After a silence of 27 years, the bell of the historic town clock at Halifax, N.S. is ringing again. It was wrecked by an explosion in 1917. The clock was built in 1863 by the Duke of Kent, father of Queen Victoria, and weighs more than half a ton.

### MRS. JOHN BAIRD PASSES

Word reached Blairmore from Calgary on Sunday last that Mrs. Margaret Baird had passed away there during the forenoon at the ripe age of 80 years.

For many years she and her husband made their home in Blairmore at the corner of State Street and Seventh Avenue. Both were very well and popularly known. Surviving are her husband, John Baird, in the home for aged at Gleichen; two sons, John and Robert, in the States; and three daughters, Mrs. Bessie Fisher, Portland, Oregon; Mrs. Beatrice McKinnley, and Mrs. Margaret McKinnley, of Calgary.

The remains were brought to Blairmore by Monday night's train, and were laid to rest in the Union cemetery Wednesday afternoon, following a well attended service conducted at the Crows' Nest Pass Funeral Home by Rev. Jas. McKelvey. Chief mourners were Mr. and Mrs. W. J. Fisher and Mr. and Mrs. Idris Evans. Pallbearers were Thomas Hughes, A. Fieard, J. Shafer, W. McVey, I. Rae and E. Morgan.

### COWLEY HAPPENINGS

Jack G. Rodgers, of the Cowley airport, is on a holiday trip to Vancouver.

Mrs. Brown, of Vancouver, is visiting her sister here, Mrs. X. C. Kaupp.

Mr. and Mrs. Marcel Percevaule left by Friday night's train for their home at Courtenay, B.C. after a two weeks' visit with relatives and friends here.

Miss Anna Papp was down from Calgary to spend the week end with her parents, Mr. and Mrs. Mick Papp. A shipment of garments, including men's knitted sweaters and other miscellaneous bits of clothing, was recently made to Red Cross headquarters by the local branch.

Ronald McNeil, of the Cowley airport, has returned from a holiday trip to Winnipeg. He travelled by auto and visited various points enroute.

The monthly meeting of the local Red Cross was held at the home of Mrs. R. Littleton on Thursday, at which special arrangements were made to hold a card party to raise money to pay for the Christmas boxes that have been sent to those serving overseas from this district. The parcels were sent along with those from Pincher Creek branch. There are 23 boys on the list: F. Benton Murphy, Otto E. Wende, J. A. Rene Thibart, A. Gordon Swart, Nick S. Papp, Raymond L. Cleland, Robert A. Warriner, George W. Burles, Gilbert Wright, James McKay, Norman P. McMillan, Ernest W. Lank, Horace W. Poulsen, John McKay, Donald McKay, Stanley N. Warriner, Clarence N. Burles, Jack E. Bundy, Willard G. Dwyer, Romeo E. Thibart, Leslie V. Gilmar, James R. Gunn and Miss Kathleen W. Elton.

Mrs. G. Dwyer donated \$8.40 to be used where needed most. \$54 was sent to the Calgary depot for supplies to be made up into garments.

The Masonic hall was packed to standing on Wednesday night for the whist drive and dance in aid of the overseas Christmas parcel fund. Gift boxes are now on the way, 20 of them, at a cost of \$69. This evening's proceeding realized \$26.50. Money was never more cheerfully raised, nor for a better cause than remembering our boys at the holy festive season. There were 17 tables at play. Mrs. E. F. Everett and Mrs. Doris Musgrave were hostesses for the evening, while Billy Musgrave acted as master of ceremonies. Music for the dance was supplied by Alvin Murphy and Kenneth Martin. These fortnightly drives will start at 8.30 from now on.

BC Doukhobors have decided to quit stripping. Some other means of attracting the public eye is being considered.

### BLOOD DONORS SHOULD REGISTER NOW

In connection with the local district Red Cross Blood Donor appeal, an office has been opened at the Fumagalli Garage premises, where registrations can be made between the hours of 6.30 to 8 p.m. daily, except Saturday, of those desiring to give blood toward the campaign.

Miss Dorothy Moore is official registrar. Registration can also be made with Mrs. J. R. Smith, phone 152; Mrs. A. R. Granger, phone 116; or to Mrs. G. W. Penn at Frank.

Volunteers are urgently needed to come forward in the next few days in order that the campaign become a success. There is nothing to be gained by withholding your name till the last minute. Register now, so that the committee can record the campaign's progress.

It may be noted again: Giving is painless. Competent doctors and nurses will be at your side while you are giving blood and keep careful check on the amount you are capable of giving. Register now.

### HILLCREST HAPPENINGS

Miss Fay Ashmore entertained a number of young friends last Thursday evening in celebration of her fourteenth birthday.

Mr. G. E. Cruickshank was a business visitor to Calgary this week.

Mr. and Mrs. W. Webster were guests of their son and daughter (Grant and Ardith) at Mountain View last week end.

Mrs. David Welsh, jr., and young son, are enjoying an extended visit with Miss Clara Emery at Calgary. Flying Officer and Mrs. A. Barrington and daughter, of Clarendon, were guests last week end of Mrs. Barrington's parents here, Mr. and Mrs. G. Thornton.

Mrs. G. Cruickshank entertained a number of friends on Monday evening in honor of Mrs. Clark, of Prince Albert. Mrs. Clark has been a guest of her sister, Mrs. L. Martin, of Blairmore.

A. Martynuk recently received a letter from his son who was residing in Czechoslovakia at the outbreak of the war. This is the first word Mr. Martynuk has had of him for over four years. It was revealed that his son had escaped from the forced labor with the Germans, and is now in England with the Czechoslovakian army.

Mr. and Mrs. Saville, formerly of Calgary, have taken up residence in Hillcrest, Mr. Saville being employed at the Mohawk mine.

Mr. and Mrs. Herbert Richards are receiving congratulations on the birth of a son at the home of Mrs. R. Stenhouse.

Misses Nettie and Mary Lazarenko and Mr. and Mrs. Fred Gregory, all of Calgary, were guests of Mr. and Mrs. Lazarenko here for the Armistice week end.

Mrs. W. Fisher entertained the members of the cigarette fund bridge club on Tuesday evening. The prize was won by Mrs. R. Henderson.

### PASTORS EXCHANGE PULPITS

A fraternal exchange will take place between the United churches of Blairmore and Bellevue on Sunday evening next. In addition to an exchange of pulpits between the respective ministers, Revs. J. McKelvey and W. H. Irwin, the choirs of girls' voices under Mrs. J. Boorman and Mrs. W. Irwin will accompany their ministers, and will render several numbers in the churches they visit.

"I can't marry that lawyer, mother," said the cad girl. "He's an atheist and doesn't believe there is a hell."

"Marry him," said the prospective mother-in-law, "and between the two of us we'll convince him he's wrong."

### FUR HARVESTING IN CANADA'S NORTHWEST TERRITORIES

While the value of fur production in Canada's Northwest Territories now takes second place to that of minerals, fur trapping is still the chief occupation of most of the natives. Harvesting the annual crop of fur is confined largely to the native population. This is particularly true over the territory covered by five native game preserves which have a total area of more than 716,000 square miles. In these, Eskimos and half-breeds living the life of natives enjoy trapping privileges over these preserves, and no licenses are required of them. White trappers who were operating in the areas at the time they were set aside as preserves have been allowed to continue earning their livelihood in this way.

Preliminary figures for the year ended June 30, 1943, indicate a catch of 822,658 pelts valued at \$2,388,629. The bulk of this fur catch was provided by fox, muskrat, beaver, marten, mink and lynx, with lesser catches of ermine, wolf, otter, fisher, bear and wolverine. Fluctuations in the numbers of various species of wild life naturally influence the fur yield, and these fluctuations are being studied by the Dominion government in co-operation with the Bureau of Animal Population at Oxford University. The establishment of native game preserves is helping to maintain the fur industry for the native population—an industry which has provided their chief marketable commodity since the early days of the fur trade in Northern Canada.

A more scientific management of the wild-life resources of the Northwest Territories is being planned for the post-war years. Already much has been done to preserve and protect these valuable resources with the object of ensuring the livelihood of those natives who from time immemorial have been dependent upon wild life for their existence. Game sanctuaries, as distinct from native game preserves, have been set aside by the government. They include the Thelon and Twin Island game sanctuaries, covering many thousands of square miles. Over these areas hunting and trapping are entirely forbidden and wild life is being gradually restored. As the need arises other areas are delimited in order to prevent further depletion of certain species. A recent example is the closing of an area of about 14,000 square miles in the Mackenzie Delta as a measure to ensure the propagation of beaver in that region.

Thus the wider plan of more scientific wild-life management in the Northwest Territories is taking shape. The value of the fur harvest in the Territories represents about 11 per cent of the total fur production in Canada and is, therefore, an important economic factor. The paramount purpose of these conservation measures is to maintain and manage this valuable resource so as to ensure the welfare of the natives who dwell in this vast region and who are still largely dependent on wild life for their livelihood, and so as to provide reliable support for the maximum human population.

### MRS. ZAK LAID TO REST

The funeral of the late Mrs. Henry Zak on Sunday afternoon last was very largely attended. Service was held at the home by Rev. J. McKelvey and at the graveside by Mr. McKelvey and F. Wajol, of Frank. Pallbearers were A. Volgrava, J. Poch, C. Poch, F. Nemura, R. Yilek and H. Poriz. She is survived by her husband, Henry; two sons, Henry, of Coleman, and Joe, of Blairmore; her mother, Mrs. Vyschlid, of Frank; three brothers, Joseph and Frank, of Frank, and Jerry, of Bellevue, and a sister, Mrs. A. Robach, of Enderby, B.C.

### LABOR-PROGRESSIVES, HOLD CONSTITUENCY CONVENTION

A convention of the Macleod constituency of the Labor-Progressive party was held in Blairmore on Sunday last for the purpose of determining their standard bearer for the forthcoming federal election.

The meeting was well attended, with delegates from Coleman, Frank, Hillcrest, Bellevue, Beaver Mines, Passburg, Blairmore and other points present. The main speaker was Pat Lenihan, of Calgary, organizer of the party, who stated that Canada's next federal election will be the most important in the history of the country, because its outcome will determine our destiny for years to come. It will decide whether our next government will lead Canada forward to win for all the people the things this war is being fought for, jobs, social security, democratic progress and unity at home, and co-operation and peace throughout the world; or whether reactionary forces will win under the leadership of Drew, Bracken, Duplessis, Low and Co. to usher in the blackest period in the history of our country. In the forthcoming election, his party with other sections of the labor movement will be basically responsible for the outcome. In spite of the plans of the reactionaries, the majority of the people realize that the main issues involved are: to maintain national unity in order to win victory over fascism, to guarantee the unity of the united nations in this coming peace, and to make possible that Canada and all countries can go forward on the path of orderly democratic progress.

Following a lengthy discussion, Mr. William Arland, of Blairmore, was unanimously endorsed as the standard bearer of the Labor-Progressive party for the Macleod constituency in the forthcoming election. In accepting the honor, Mr. Arland spoke briefly, stating in part: "While I accept and am highly honored by the privilege this convention has bestowed upon me, I still feel that if the people will join with the members of our party in friendly discussion upon the issues which lie before us, and if these people will decide to nominate a man or woman of progressive character who will fight in parliament for the policies of the United Nations, I will willingly withdraw my candidature and support to the best of my ability such a candidate in the interests of a free and prosperous Canada, and a peaceful, joyful world for all the people."

### URGES CONSCRIPTION OF DRAFTTEES

The Canadian Legion in a letter to every member of the House of Commons this week has sought parliamentary support for conscription of draftees for overseas service.

The letter, signed by Alex. Walker, dominion president, pointed out that among the Legion membership there were many French Canadians and representatives of other races, and added "We hold them all in deep affection and respect." However, the letter continued, there was only one possible course that would really unite Canada, and that was by utilizing forthwith all the trained men, whether draftees or volunteers, as reinforcements for overseas.

The latest move on the part of the Legion follows a public statement calling for conscription, the interview between the Legion dominion council and Prime Minister King, and a call to all branches to rally public opinion.

Nowadays there is not so much moisture to an election, but we read where President Roosevelt was "swept" into office.

Jerry says chopsticks make ideal kindling.

**Picobac**

More men smoke Picobac than any other Pipe Tobacco in Canada

**Post-War Trade**

THERE IS CONSIDERABLE INTEREST at present in the prospects for post-war trade and for the future demand for the products of Canadian farms and industries. It is evident that other nations are also concerned with the matter of rebuilding their normal trade connections when the war is over, and there have recently been reports in the press concerning plans for expanding merchant fleets and developing trade relationships. In recent discussions on future world security, considerable attention has been given to the subject of international trade relations, and it has been clearly shown that in this, as in many other problems, there will have to be a new approach if we are to avoid repeating the mistakes of the past.

### Much Exported From Canada

Canada's present position in regard to export trade is extremely favourable, in fact the volume of exports from this country has never been as great as it is now. Figures show that Canadian exports are at this time more than twice as much each year, as they have ever been in the past. We are reminded, however, that this property is due largely to the war, and that eighty per cent. of our present export trade is made up of materials of war. Farm products, including butter, eggs, cheese and bacon are now in great demand on the British markets, but when normal conditions return, it is thought that Britain may once more buy these products much nearer home. Food shortages in many lands have also created a need for wheat and other Canadian grain crops, which may not continue long after the war is ended.

### Research Aid To Prosperity

It is apparent that if Canada is to maintain the present level of export trade, efforts will have to be made to hold as many markets as possible and to find new ones. One way in which to retain markets for agricultural products is in continuously improving the quality of the goods which is exported, with the object of building a marked preference for them abroad. New markets can be created, in part, by finding new uses for our products. This involves research, and there is a growing consciousness in Canada of the need for greater emphasis on this important factor in national development. A recent announcement by the Minister of Trade and Commerce concerning the establishment of a new laboratory in Western Canada for work on the wider utilization of farm products is an indication of the trend in that direction, and it is to be hoped that further impetus may be given along these lines, in the interests of post-war prosperity.

### Safety Glass

Is Now Being Used In Planes For Windshields

Pioneered by safety glass in automobiles, glass has now taken to the air. Laminated glass is used in planes for windshields, enclosures in cabins, gunners' turrets and bombers' noses. The glass consists of two pieces of plate glass with a sheet of plastic in between to prevent shattering. The latest installation methods have given flexibility and strength to make the glass almost a transparent steel according to scientists.

### JUNGLE FARE

Military surgeons meeting in New York last week got a taste of life in the jungle via "survival menus" offered them by representatives of the Army Air Force School of Applied Tactics. Among the sixty delicacies were rattlesnake steak, fillet of shark, baked roots of nettle, baked catfish, wild coffee and palm cabbage salad. At last report all diners had survived—New York Times.

### MYSTERY UNSOLVED

Rudolf Diesel, inventor of the now famous Diesel engine, did not live to see the full exploitation of his invention. One night in 1913 he strangely vanished from a mail steamer while crossing the English Channel and the mystery of his death is unsolved to this day.

### ARE STILL TRAVELLING

The stars forming the world-famous constellation, "Southern Cross", were last seen on the horizon of Jerusalem about the time of the Crucifixion, but due to the equinox, they are no longer visible from Europe.

China's population has been estimated at 474,787,000.

### ITCH CHECKED

For quick relief from itching caused by eczema, sunburn, insect bites, and other skin irritations, use **ITCH CHECKER**. It is a powerful, soothing, and healing ointment. Do not use on open sores or cuts. For full directions, see box.

**MACHIN'S SYRUP**

FOR COUGHS, COLDS, BRONCHITIS

STILL THE FAVORITE

### Vocational Training

Plays An Important Role Both in War And In Peace

Now providing rehabilitation training for persons discharged from the services, Canadian Vocational Training has been playing an important role in civil as well as military life. From its inception up to May 30 this year, gross enrolment under the programme totalled 346,339. Of these, 223,642 had enrolled for training in industry, 114,786 for instruction as tradesmen in the forces, 8,558 for rehabilitation training and 5,373 as university students.

Canadian Vocational Training grew out of the Dominion-Provincial War Youth Training Programme, conducted under the Youth Training Act of 1939. When this expired in 1942, the Vocational Training Co-ordination Act provided for the continuance of the types of training needed for the war effort.

Training is given in technical schools, special centres and industrial plants. Projects conducted under the programme include full-time pre-employment courses of from two to six months; part-time training, mainly technical, for persons already employed in industry, to facilitate up-grading and promotion; courses from two weeks to three months in plant schools; job relations and job methods training for foremen and supervisors; and courses for tradesmen in the armed forces.

### Spun-Glass Fabric

Plans Already Made In Britain For Post-War Production

Fourteen years of research have gone into the development of a British spun-glass fabric demonstrated in the lounge of a London hotel.

John Boyd, managing director of the firm which manufactures the material, said plans are ready for post-war production of household fabrics of many types.

"Its value as curtaining material is outstanding," he said. "It cannot acquire more than surface dirt because it is non-cellular—unlike cotton, for instance."

The glass cushions in the hotel began as sand on the shores of Loch Alne. In the Sound of Mull, the glass cloth can be made in scores of shades and is to all intents everlasting.

It is fireproof, mildewproof, rot-proof and sunproof. It can be cut with scissors and stitched on the family sewing machine; and it can be spun or woven on machines already in use in British mills.

### Post-War Flying

American Paper Mentions Two Facts On Civil Aviation

Two facts on international civil aviation should be kept in mind. First, the United States position as a world power entitles us to full consideration in the development of foreign routes, but the principle of reciprocity must still apply. In the long run, we cannot fly to foreign countries unless we accept the right of others to participate equally in a developing new form of transportation. Second, generalities on international co-operation are meaningless unless the principle is applied to specific issues of trade and commerce—as it has already been applied in the world monetary agreements at Bretton Woods.

The American approach to post-war aviation should be founded on these two facts—both in the temporary allocation of world air routes now and in the later development of permanent international machinery.—Chicago Sun.

### House of Commons

Britain To Replace The Chamber Destroyed By The Blitz

A "fresher, brighter, more alive House of Commons" will arise in Whitehall after the war.

A report by Earl Winterton's select committee announced that the proposed new House of Commons will cost more than £700,000 (\$1,510,000). The new House is to replace the chamber destroyed in the blitz. It is to have better acoustics, more seating—except for the members of Parliament—and better ventilation.

The heating system will be used to produce all the atmospheric conditions of a warm Spring day out of doors.

The dimensions of the new chamber will be the same as that of the old. The committee's report was unanimous that the sense of intimacy and controversial form of debate encouraged by the dimensions of the old chamber should be maintained.

Favorite food of the ancient Indians of Peru was popcorn, which was popped in a specially shaped earthenware implement.

### Price Control And Rationing Information

Q—I have a stock and grain farm and have a house on the farm rented to a man and his family by the month. The man rented this house, which was then vacant, when he came to our town to work in a war industry. I now require the house for hired help who will work on the farm. What procedure do I have to take to get the present tenants out and how much notice do I have to give? They are good tenants and the only reason for the change is the need for the house for the hired help.

A—If the property is rented solely for agricultural purposes, the rentals therefor could be given a notice to vacate in accordance with the laws of the province. The facts herein indicate that you have rented this property as housing accommodation only. You cannot, therefore, give a notice to vacate to the present tenant unless you wish to occupy the property personally or want possession for occupancy by your mother, father, son, daughter or daughter-in-law. If the notice to vacate is given under the rental regulations, the form of notice is supplied by the Wartime Prices and Trade Board.

Q—When can we use our new number five ration book?

A—Valid coupons in number five ration books may be used on and after November 23.

Q—Does the order limiting cream content in milk prohibit the sale of Jersey milk?

A—There is no order prohibiting the sale of natural Jersey milk or any other milk which is in its natural state. Order A-1250, effective July 1, 1944, merely prohibits the manufacture of special high butterfat milk by the addition of extra butterfat to standard milk. This step was taken to conserve butterfat for more essential purposes.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book in which are listed the current selling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

### To Protect Sailors

New Inventions Give Shipwrecked Men A Fighting Chance

The combined efforts of scientists and factory workers in the Dominion have added to the devices for keeping downed airmen and shipwrecked sailors afloat and on land.

Tucked away in lifeboats or rubber dinghies these days is an apparatus which assures the castaway a steady supply of fresh drinking water.

By means of a small portable still he is able to extract fresh water from solid ice. In addition to its distilling facilities, this apparatus is equipped with a grill for broiling fish and a pressure cooker for preparing dehydrated foods.

Although it generates intense heat, this new non-explosive fuel comes in a solid form and burns without liquidifying. This eliminates the danger of fire in a rocking lifeboat.

### CHRISTMAS MAIL

Postmaster General W. P. Mulock said that Canada's Christmas mail for overseas will be more than double the normal. In addition to its distilling facilities, this apparatus is equipped with a grill for broiling fish and a pressure cooker for preparing dehydrated foods.

Many natives of Brazil drink from 10 to 20 cups of coffee a day.

**DO THIS FOR Night Coughing**

WHEN A cold strikes up the nose, causes mouth breathing, throat irritation and chest pain, use this time-tested Vicks VapoRub treatment that goes to work instantly—2 ways at once!

At bedtime rub good old Vicks VapoRub on throat, chest and back. Then watch his PENETRATING, STIMULATING action bring relief from distress.

It PENETRATES to upper breathing passages with soothing, medicinal vapors. It STIMULATES the throat and chest muscles, giving warming, comforting poultice... and it keeps on working for hours, even while you sleep... to ease coughing spasms, relieve mucus-laden throats and loosen and bring grand comfort! Try it tonight—old Vicks VapoRub.

**SERVED Hot or Cold**

**IT'S A TASTY ENERGY BREAKFAST**

On cool mornings, try Nabisco Shredded Wheat this way: Dip the biscuits, quickly into hot water, drain and serve with hot or cold milk. Or split them, toast lightly, dot with butter, serve with top milk or cream. Plan breakfast around Nabisco Shredded Wheat. Growing youngsters especially need the food energy it helps to supply.

### SMILE AWHILE

"What did you give your baby for his first Christmas?" asked Mrs. Richards. "We opened his money-box," replied her friend, "and gave him a lovely electric iron."

First Actor—There is as much strength in an egg as a pound of meat, indeed.

Second Actor—Struck me that way, too.

"Can any one tell me," demanded the first actor, "who died most in the nineteenth century to raise the working class?"

"Yes," replied one of the crowd, "the inventor of alarm clocks."

Dorothy—How old is Mildred? Catherine—I don't know. But 10 people were overcome from the heat of the candles on the cake at her birthday party last night.

Johnny, who had been taken to the country for the first time, saw a spider spinning a web between two tall reeds. "Father," he called, "come and see this bug putting up wirefence."

Uncle George—So this is the baby, eh? I used to look just like him at that age. What's he crying about now?

Little Niece—Oh, Uncle George, he heard what you said.

"Yes," said his proud mother. "John is such a good boy, and fond of dumb animals. Why only last night I heard him say in his sleep, 'Feed the kitty, feed the kitty.'"

Mistress (heartily crank)—Have you broken anything, Jane?

Jane—I'm afraid so, mum—my New Year's language resolution and your new tea set.

Deacon Smith—I don't believe Parson Brown ever told a lie about any one.

Deacon Preddy—I don't know about that. He has preached a good many funeral sermons.

"I like that dress you're wearing."

"I got it for my twentieth birthday."

"Really! It has worn well, hasn't it?"

The disgruntled shareholder was venting his wrath on the chairman of the company meeting.

"Sir," he said, "I think you're the biggest rascal unhung."

The chairman retained his dignity.

"Sir," he said, "you forget yourself!"

### INCREASE IN FARM AREA

Statistics just published, show a 78 per cent. increase in Northern Ireland's tillage area in 1944 as compared with 1939. The comparable increase in England and Wales was 69 per cent., and in Scotland 46 per cent. The number of cattle is the highest on record but other livestock have declined.

### GENERAL SERVICE BADGE

Active army soldiers will wear the general service badge on their greatcoat sleeves as well as tunics this winter. It was announced from headquarters of Military District No. 8. Previously, the badge was worn only on tunics.

Bees can distinguish between different degrees of brightness of a given color but are blind to red.

The Braille alphabet was first published in 1829.

### Sugar Beets

Increase In Production Is Shown Over Last Year

According to present estimates, the 1944 production of sugar beets will be sharply increased over 1943. A new sugar beet-growing area was developed in Quebec this year from which a harvest of 85,000 tons is expected. Production in Southwestern Ontario, estimated at 125,000 tons this year, is nearly double the 1943 crop. Alberta, at 338,000 tons also shows an increase which more than counterbalances a decrease in Manitoba. The total 1944 crop of beets, now placed at 608,000 tons is 28 per cent. greater than in 1943.

Sugar beet lifting operations got under way in Ontario the first week in October under fairly favourable conditions. Of the two Ontario processing plants at Chatham and Wallaceburg, only the latter will operate this year. In Manitoba heavy September rains, particularly in the Red River Valley, did considerable damage to the sugar beet crop, with many fields standing under water. More favourable conditions are reported in Alberta.

### Compensation

Great Britain Will Support Netherlands In Claims On Germany

Great Britain will support The Netherlands government in demanding territorial compensation from Germany for damage inflicted by the Nazis in Holland. Clement Attlee, British deputy prime minister, told Commons.

The Netherlands, Attlee said, has reserved the right to claim compensation in the form of "a suitable part of adjoining Prussian territory which would either be ceded or brought within the economic orbit of The Netherlands on a provisional or permanent basis."

### MOVE OUT

Sixty-seven Japanese left British Columbia during October, the B.C. Security Commission reported. Those who left went to permanent employment east of the Rockies. Totals by provinces were: Alberta, six; Saskatchewan, two; Manitoba, 15; Ontario, 40; and Quebec, four.

The tower of Babel, at the Chaldean city of Ur, in lower Mesopotamia, has completely disappeared.

## Would Develop Churchill Port On Hudson Bay

SASKATOON.—Substantial two-way trade through the Hudson Bay port of Churchill in northern Manitoba is "quite possible," Labor Minister C. C. Williams of Saskatchewan told the On-to-the-Bay Association.

And in an effort to develop such trade, he said, Co-operative Minister L. F. McIntosh was on his way to Great Britain to confer with leaders of co-operative there on the "exchange of western Canadian raw materials for Britain's manufactured goods."

Mr. Williams' address followed one by C. A. Hurst, formerly treasury officer for the Dominion government at Churchill, who said the shipping season through Hudson Bay could be extended to cover the entire year.

The provincial labor minister, remarking the route had been criticized by "certain persons" because it was a one-way route, said it was not the only line that was one way. Thousands of freight cars carried wheat to the great lakes and returned empty, he said. But the route could well be a two-way one, and Mr. McIntosh was going to enter into negotiations to that end.

Mr. Williams asserted there was discrimination against the Hudson Bay Railway, which links southern Manitoba with the port, and to support his claim he gave what he said were the latest freight rates. The rate on most from Regina to Montreal was \$1.58 a hundredweight, while from Regina to Churchill it was \$1.19. Since the distance from Regina to Churchill was half the distance to Montreal, he argued, the rate to Churchill should be half the rate to Montreal, or 78 cents.

The comparative rates on imported shoes coming by way of Montreal and Churchill were \$2.41 and \$1.58 a hundredweight, or an "obscure" \$1.85 and \$1.19.

Hon. J. L. Phelps, provincial minister of natural resources and industrial development, who presided, said there were three things wrong with the Hudson Bay railway and Churchill set-up. Management was in the wrong hands, he said, freight rates were inequitable and advantages in existing freight rates were not passed on to the producers.

"The port will never amount to a snap of the finger unless we have someone administering it who will see that the harbor is utilized," the minister said, adding that he was not criticizing the national harbor board because it was a judicial body and not interested in getting traffic.

"It is our own neglect," he asserted.

The Saskatchewan government was prepared to call a conference on the question at the earliest possible moment and it asked for an expression of public opinion as to what should be done and how it should be done.

He said he believed the federal government was prepared to turn the administration of Churchill and the railway over to the west.

Mr. Hurst, who was at Churchill for eight years, said in his address the port could be kept open throughout the year if certain steps were taken to insure the route through ice-free.

The association changed its name to the Hudson Bay Route Association. W. G. Streeton of Plunkett, Sask., was chosen president, with J. M. Henderson of Regina as vice-president and Frank Ellison of Saskatoon, secretary.

## SHIP PRODUCTION

United States Launching Twelve Ships Per Day

NEW ORLEANS.—Rear-Admiral Frederick G. Crisp, director of the United States navy division on shore establishments and civilian personnel, disclosed that "12 ships a day now are sliding down our ways."

Crisp speaking at a meeting of the metal trades department of the American Federation of Labor, said that the navy's production program "is still increasing and we expect to have as many persons working on navy work six months from now as we have today. Our battle of production," he added, "will end only with the defeat of Japan."

He said that increased tempo of the Pacific fighting was creating new production demands.

## LUXURY AIR LINES

LONDON.—M. Proctor-Gregg, an official of the Bristol Airplane Company, said that the air liner his company would construct would be the biggest, the heaviest, the most expensive and the most luxurious and fastest air liner in the world.

## HONEY RATIONING

Cannot Be Lifted Until Sugar Supply Shows Some Improvement

CALGARY.—Prospects for lifting the ration on honey are not bright. In the opinion of the nation's leading producers who attended the annual meeting of the Canadian Beekeepers' Council here.

They point out the honey ration could hardly be removed before the sugar supply becomes improved, and they add the sugar shortage now is worse than ever.

P. C. Colquhoun of Maple Creek, Sask., is president, and W. G. Le Maître, Alberta provincial apiarist, vice-president; R. M. Pugh of Fort Qu'Appelle, Saskatchewan provincial apiarist, secretary.

Although the industry could expand considerably, the normal domestic demand could not be increased just as much, Mr. Pugh said. The council is discussing advertising and other plans for boosting post-war demand within Canada to ensure prosperity for the industry. A large export business is not contemplated.

## TRIP WAS RISKY

Churchill And De Gaulle Faced Ills—Said To Inspect French Army

ON THE VOYAGE FRONT.—Prime Minister Churchill and Gen. de Gaulle, who died in a 100-mile drive in a blizzard over tortuous ice and snow-bound roads in the Jura mountains to inspect units of the French army.

Thirty cars originally set out with the prime minister's convoy, but only 10 finished the course; the remainder being either ditched or snowbound or gaur up.

One press jeep snowed out of the road down a 12-foot embankment into a field. Despite the rugged ride the prime minister kept going right to the end, when he admitted he felt tired.

Mr. Churchill's car was the first to have trouble when its tire chains snapped, causing a hold-up. They snapped a second time during the tour.

Gen. de Gaulle was in the prime minister's car and sharing the rigors of the tour was Mr. Churchill's daughter, Mary Churchill.

## BRIDGE BUILDING

Record Is Made In Italy By Canadian Sappers

WITH THE CANADIAN CORPS ON THE ADRIATIC.—A record in bridge building has been made by Canadian sappers under Maj. Ken Wade of Hanna, Alta., who constructed in three hours a 30-foot Bailey bridge over the Ghila canal, about five miles south of Ravenna.

The bridge was thrown across the stream in the middle of the night under shell fire recently and British armored cars then darted across to attack a Nazi post. They killed 10 Germans, wounded 20 and returned safely.

## MAKES NAZIS MAD

STOCKHOLM.—Dr. Paul Schmidt, German office spokesman, in a statement in Berlin accused the Swedish press of fomenting "enmity" between Sweden and Germany, and declared Sweden was "being systematically exploited by belligerent America as an assembly place for its bombers."

Buy War Savings Stamps regularly.

## Polish Soldier Makes Friends

Two little Dutch boys, having no leaky dykes to stop up with their fingers, spend their time sharing in the luncheon of a Polish soldier who is fighting with the Allied armies to drive the Germans from Holland.

## Disposition Of The Canadian Forces Overseas

OTTAWA.—Defence headquarters issued a statement on the disposition of Canadian forces overseas which explained the integration of Allied arms and stressed that despite the policy of interchange, formations were assured of their reinforcements, supplies and equipment.

The statement added:

"The Canadian units, for example, all the personnel are Canadian and reinforcements are provided by Canadians through Canadian reinforcement depots in the theatres. These in turn are backed up by the Canadian reinforcement units in England."

No reason was given for instance of the statement other than the comment that press reports from Europe and defence headquarters announcements had indicated the presence within Canadian formations portions of British, United States and other Allied armies. The same source had stated Canadian forces have served under Allied command.

The statement said: "It is perhaps not so well known that the First Canadian Army commanded by Lt.-Gen. H. D. G. Crerar, has not a fixed composition and the number of corps and of divisions of which it may be composed varies from time to time in relation to the task in hand. When operations call for a concentration of strength the additional strength placed at the disposal of an army commander is drawn from neighboring armies."

"This explains why the First Canadian Army may have under its command formations from any of our Allied armies and similarly explains why Canadian formations may in turn engage in operations under other than Canadian command."

The statement referred to the Canadian corps in Italy serving with the British Eighth Army, commenting that "its place in the Canadian army in northwest Europe is filled by a similar formation from Allied armies." The corps in Italy and the Canadian corps with the First Army "constitute the Canadian army overseas."

The statement concluded: "The ability to concentrate and integrate their forces where and when required demonstrates the high degree of training, planning, standardization of weapons and equipment and co-operative organization which has been achieved by the forces of the United Nations."

## ROAD OF DEATH

Nazi Surface Road With Ashes Of Their Victims

MOSCOW.—A "black road of death" surfaced with the ashes of millions of victims of the Germans has been found in the area of the notorious "death camp" at Rembik in northeastern Poland.

At this camp, several million people are stated to have first been gassed and then cremated on huge wooden pyres.

Survivors said the Germans used a mixture of human ashes and bones instead of asphalt to cover this road.

## Awarded V.C.

Lieut. (acting captain) Michael Alimand, 4th Gurkha Rifles, awarded V.C. posthumously for having made single-handed charges against Japanese machine-gun nests in Burma on three separate days.

## TOOK ACTIVE PART

Canadians Participated In Final Attack Which Destroyed Tirpitz

LONDON.—A young Canadian bombardier, F.O. Walter Daniel of Rivers, Man., who flew in the leading R.A.F. Lancaster in the attack that sank the German battleship Tirpitz in Norway's Tromsø Fjord, may have been the first to smash the one-time pride of the German navy.

Daniel who, as a member of the raid leader's crew pressed the button that released a 12,000-pound earthquake bomb on the Tirpitz, told a crowded press conference his Lancaster was in the first waves of five bombers and that crews following observed two direct hits and two near misses.

The 24-year-old Daniel was the only Canadian among six members of the participating crews who were flown to London for the interviews. It was believed, however, that at least a dozen Canadians participated in the attack, another one being Flt. Lt. Johnny Loftus of Toronto who flew as a movie cameraman.

Daniel said 29 of the 32 Lancasters on this long-distance raid each dropped one "earthquake" bomb—a total tonnage of approximately 15 tons—from a height of 13,000 feet, and the morning was bright and clear.

## GOODS FOR FRANCE

Looking To Canada For Material For Rehabilitation Program

OTTAWA.—Negotiations are under way with a view to supplying considerable quantities of Canadian goods to France for use in reconstruction, it was learned.

It is known France is looking to the Dominion for much of the material she will require in a rehabilitation program.

It is learned that requests from the provisional French government for materials needed for reconstruction now are under consideration, but it is not yet apparent how much of it will come under the mutual aid program and how much will be on a straight export basis.

Raw materials and fertilizer are listed among the goods which France is expected to need in considerable quantities and which Canada is likely to be in a position to provide.

## ALBERTA OIL

Drilling Operations Are Underway In Several Areas

CALGARY.—Oil drilling operations now are underway in the plains area of southern Alberta. A total of 14 wells are now drilling. Several of them come as a direct result of the California Standard Oil strike at Princeton, 125 miles east and slightly south of Calgary, several weeks ago.

While test results were awaited only recently, rumor had it that the well was capable of 1,000 barrels or more per day. This might prove to be well founded if the complication due to the danger of drawing water should suddenly become cleared up, and the well were permitted to flow freely. The official test figures show production at the rate of 200 to 250 barrels per day through an extremely restricted opening of about 1-6 of an inch.

The great significance of the well, over and above its own production potential, lies in the fact that it tapped Devonian strata which are known to underlie nearly 400,000 square miles of western Canada. It proved that rocks of this age were capable of carrying oil in commercial quantities.

## High Tribute Paid To France By Anthony Eden

LONDON.—Foreign Secretary Eden told the House of Commons that Germany's "tyrannous rule over France had resulted in placing Britain's friendship with France on a surer foundation than ever existed before in the history of our two countries."

"France will recover," Mr. Eden said. "Before now in her history, she has shown powers of recuperation which have astonished the world."

He paid high tribute to Gen. de Gaulle—"the man who today is unquestionably the inspirer and the man who personifies the unity of the French people."

The French leader, he added, has surrounded himself "with a band of young and vigorous colleagues who have proved their worth in the ordeal through which France has passed."

In a report on the welcome accorded Prime Minister Churchill and the British delegation to the Paris conference with Gen. de Gaulle, the foreign secretary declared:

"One felt behind the tumultuous greetings of these vast and orderly crowds the heart beat of a nation once again united with its allies and confident of its own future."

## TRIBUTE FROM BELGIUM

OTTAWA.—The Earl of Athlone has received from Prince Charles regent of Belgium, a message expressing the "deep gratitude and sincere admiration" of the Belgian people for the part played by the Canadian army in the liberation of the Belgium homeland.

STOCKHOLM.—A Swedish government commission is reviewing this country's alien laws in order to close any avenues which might be open for the entry of war criminals or other undesirable refugees seeking haven in Sweden, a spokesman said.

## A Market In Britain For All Surplus Beef

OTTAWA.—Canadian beef producers are assured of a British market for all surplus beef in 1945, Agriculture Minister Gardiner announced.

He was referring to an announcement in the British House of Commons by Food Minister J. J. Llewellyn that while Canada would supply in 1944 and 1945 a minimum of 50,000,000 pounds of beef each year, Britain actually would purchase a minimum of 112,000,000 pounds in 1944 and 184,400,000 in 1945 and would therefore be ready to take a Canadian surplus.

Mr. Gardiner explained: "It has been the policy of the Dominion government since early in the war to have a clause in the agreements with Britain read 'not less than' a given number of pounds. The beef agreement was the first departure from this in that a maximum as well as a minimum was set. The statement made by Col. Llewellyn removes the maximum limitation and in effect says to Canadian producers there is a market in Britain for all surplus beef for the year 1945."

## SHELL OUTPUT

An Imperative Need For More Heavy Ammunition

OTTAWA.—Canada's heavy ammunition program is being maintained at a record rate, but close to 10,000 workers are required to further increase the output.

Effective use of concentrated artillery fire has resulted in a tremendous need for heavy ammunition and Canadian plants are working at top speed in an effort to fill overseas requirements.

The Canadian heavy ammunition program, expected to drop about 25 per cent. during the present year, was stepped up sharply last summer as a result of sudden demands from battlefronts.

The extent of that demand was illustrated in Washington by Robert Patterson, United States undersecretary of war, who said there was "an imperative need" for more artillery ammunition.

From Canada's \$200,000,000 ammunition industry has come more than 70,000,000 shells and 30,000,000 bombs. The small arms program has resulted in 4,000,000 rounds of rifle and machine gun ammunition—sufficient to build up a stockpile which has made possible the transfer of some workers to plants in heavier production.

The total heavy ammunition production during the war has passed the \$1,000,000,000 mark in dollar value.

Emphasis is on the need for 25-pounder shells as well as 4.5-inch and 5.5-inch types.

## NONE IN RESERVE

West Front Needs More Artillery Ammunition Than U.S. Produces

WASHINGTON.—Robert Patterson, United States undersecretary of war, reported that Gen. Eisenhower has an imperative need for much more artillery ammunition than we are producing.

He took a news conference that troops on the western front are firing 35 days' planned supply of heavy artillery ammunition in 10 days and there are no reserves in the United States. That implied a tremendous drain on ammunition stock piled up in Europe.

## MOUNTAIN PEAKS

Are Named After Prominent Personalities In The War

VICTORIA.—Mountain peaks in the northeastern corner of the Peace River block have been named after Prime Minister Churchill, President Roosevelt and Marshal Stalin, Lands Minister Kenney announced.

A group of three peaks have been named "Churchill Peaks," the others being single eminences. All are 9,500 feet high.

The peaks lie north of the Finlay river and just south of the Alaska highway.

## RESIGNING POST

LONDON.—Malcolm MacDonald, United Kingdom high commissioner in Ottawa, has "intimated" to the executive of the national labor party his decision to resign his Ottawa post at the end of the year. Mr. MacDonald's election agent at Dingwall, Scotland, said in an interview.

The word "novel" means "council" in English.

## These dimes work their heads off

No doubt you've seen dimes worn so thin that you can't see the heads on them.

That's what happens when money is really passed around.

That's what happens every year to at least two and a half billion dimes that are put into circulation through the life insurance companies. These dimes really go to work.

They come in the form of premium payments from four million policyholders and if you prefer figuring in folding money, they amount to 250 million dollars.

In peacetime these dimes are not idle. They are kept busy through investment in a great variety of local and national undertakings. For the past five years they have been busy in a strictly military sense—backing up our fighting men with more than a billion dollars' worth of Victory Bonds.

These busy dimes are helping to buy security for you and yours—both in the present and in the future—both at home and abroad.

It is good citizenship to own

## THE fight against V.D. is a family affair ...

A laughing couple, dodging showers of rice ... inside ... garden ...

These are scenes we know and like, because they're part of our lives ... because they spell happiness ... contentment.

But we know that these things don't "just happen." They have to be worked for, lived for. Protected, too, because of ever-present dangers which may spoil them.

Veneral Disease is a spoiler. In a cold, relentless way it can kill infants, rob the home of its breadwinner, cripple, destroy. These are not mere possibilities. THEY HAPPEN ... RIGHT HERE IN CANADA!

But, these things should never happen. They can be prevented.

Young men and women can safeguard their future happiness together by making sure before marriage that V.D. will not blight their plans. A medical examination, including a blood test for syphilis, is a protection no couple can afford to pass up.

The expectant mother, too, may have for sure that her baby will be all she dreamed of. Syphilis in the expectant mother rarely shows outward signs, and it is no respecter of persons. An early check-up by her doctor, including a blood test, is a most essential, yet simple, first step in protecting her baby's health.

Nor must the breadwinner neglect his part. The security of the home depends upon his ability to work regularly and efficiently. Unsuspected syphilis, striking in middle life, may make the head of the home unable to provide for his family. It is wise to KNOW FOR SURE in time. Industrial medical examinations should include a routine confidential blood test.

A blood test should not be looked upon as something unusual. It should be regarded for what it is ... a normal safeguard of health, security and happiness.

Invest a few minutes of your time in ASSURANCE.

## FIGHT VD ON THE SECTOR FRONT

For all the facts about VD write your Provincial Department of Health for the new, free booklet "VICTORY OVER DISEASE."

Sponsored by  
DEPARTMENT OF NATIONAL HEALTH AND WELFARE  
to further Canada's fight against V.D.

## WANTED IMMEDIATELY— ONE BED!

Junior's a big boy now ...

He's going to be pretty mad if he doesn't get a proper bed soon. But beds cost money ... and dad sometimes lacks the ready cash for even such an essential purchase as this ...

There is an answer. Loans to meet all kinds of personal financial emergencies are constantly being made by The Royal Bank of Canada ... loans that can be repaid in convenient instalments over 12 months, or even longer if necessary. Making Personal Loans is part of our day-to-day banking business. The cost is low. There are no "extras." Should you require a personal loan for any reasonable purpose we invite you to talk it over with the manager of our most convenient branch.

## PERSONAL LOANS AVAILABLE

To pay doctor, dentist or hospital bills ... to meet taxes ... to consolidate debts ... to buy fuel ... to repair or improve the home ... to meet educational expenses ... to take advantage of bargain and business opportunities ... to meet emergencies, etc. Endorsers not necessarily required.

# The KIDS ARE CERTAINLY TOUGH ON SHOES!

1,300,000 MORE PAIRS  
OF CHILDREN'S SHOES LAST YEAR

In the last twelve months Canadian manufacturers made for Canadian children about 25% more shoes than in 1939—a fine job—done by the organization and direction of production by this Board's Footwear Administration and the co-operation of manufacturers. And this was accomplished while they were making more essential type shoes for war workers, who wear out their shoes faster than they do in their normal employment.

## THE DISAPPEARING ACT OF RUBBER-SOLE SHOES

In normal times most young Canadians got at least one pair of rubber-soled, canvas-top shoes a year. But natural rubber supplies fell into enemy hands, and the manufacture of rubber footwear was drastically curtailed. We're now using reclaimed and synthetic rubber in these shoes—there have been more of them this year and there will be more next year. Leather-soled shoes have had to be used in place of this rubber-soled footwear but shoes made of leather need more care than running shoes. Where they don't get it they wear out more quickly; when they get it they must be dried slowly, away from direct heat—and they should be greased also. It's not always a case of poor quality; it's poor care.

## LEATHER GOES TO WAR

You've got to have good strong leather for children's shoes, but the soldiers are taking most of ours for their boots. For these leathers, a substantial portion of the hides came from South America and other countries. War cut down these imports and there have been difficulties in getting enough of these and our own hides tanned into leather due to shortage of workers. The production of high grade leathers shoes has, however, been maintained at the highest level consistent with the labour and materials available. While shoe factories have been working overtime, factory capacity for civilian shoes cannot be expanded in wartime and it's not possible to change plants from the manufacture of one type of shoe to another—for instance, from women's to children's. The processes, the machines and the lasts are different.

There are very large war uses of leather—for instance, in footwear. A soldier requires four pairs of shoes in the first year of his service and about three pairs per year thereafter. But, what is more important, he needs to have his shoes re-soled four or five times a year. His shoes are of the highest quality leathers obtainable, leaving the other grades of leather for civilian use. Airmen need leather for jackets and mitts. War factories need leather for belting and farmers need leather for harness. Leather—the best leathers—has gone to war.

## TURNING HIDES INTO SHOES

There are very large war uses of leather—for instance, in footwear. A soldier requires four pairs of shoes in the first year of his service and about three pairs per year thereafter. But, what is more important, he needs to have his shoes re-soled four or five times a year. ## ADULT EDUCATION ACTIVITIES IN ALBERTA

There is evidence in Alberta of a keen desire for adult education. Many people are welcoming the opportunities extended to them in this direction by the Department of Extension, University of Alberta, and by the Alberta Adult Education Association. The following is a brief summary of activities which have been carried on this fall.

During the first week of November, leadership conferences were held at Lehigh, Calgary and Edmonton. The purpose of these conferences was to give all those interested information on the methods of organizing study and discussion groups. Representatives from many country points, as well as from the cities, attended these meetings. An entire day was given over in each case to the proper procedures for getting study groups started and maintaining their effectiveness. Present at these conferences were dominion and provincial officials connected with national farm radio forum and the citizens' forum. These men demonstrated how the radio forum can be used as a means for fact finding and for investigating, prior to intelligent action for community welfare.

There was considerable discussion during these sessions regarding the possibilities of councils on adult education. It was claimed that these councils, co-ordinating all the educational activities in a community, can prove of much value in securing unity and in promoting worth while projects.

The conferences were sponsored by the Alberta Adult Education Association, the Department of Extension of the University of Alberta, and the Alberta Federation of Agriculture.

Frank Peers, the provincial secretary of the citizens' forum, plans to have 150 groups organized this term. Those wishing information concerning the citizens' forum, heard every Tuesday evening at 9 o'clock, should write to Mr. Peers at the Department of Extension.

Three high schools in Edmonton have now been opened in the evenings for adult classes. They are Garneau, Eastwood and Westglen. Adult students attend these schools one day in the week for six consecutive weeks. For the first period, they enrol in any one of the six subjects: home building, know Alberta, current history, science, child psychology and systems of government. Lectures and discussions in these subjects continue for an hour and fifteen minutes. Then the entire group gathers in the school auditorium for a general assembly. The theme of the general assembly in the Edmonton schools is "Canadians All." Through the medium of music, dancing, films and brief explanatory talks, the contributions of the various peoples who make up Canada are described.

At Eastwood school there is a class in English for those with a limited acquaintance with the language. Some thirty people are being instructed in the rudiments of writing, spelling and pronunciation.

The Calgary council on adult education has launched a similar scheme. Western Canada High School is being used for classes on six consecutive Monday evenings. Well-known speakers and instructors have been secured to deal with the following subjects: so—you're going to build, current events, know your city, appreciation of Canadian literature and the world of science. The general assembly is devoted to documentary films on vital topics of the day. A course in music appreciation offered each Sunday at the Public Library is also sponsored by the Calgary council.

Medicine Hat is planning now for a series to begin after the Christmas holidays, as is Lacombe.

Representatives of the Department of Extension of the University and of the Alberta Adult Education Association plan to visit more than a dozen centres in Alberta for the purpose of stimulating interest in radio forum groups and in adult education councils.

## SAVE THE CHILDREN FUND

An urgent appeal to Canadian women for kits of clothing to help dress 45,000 European child refugees now being sheltered in Sweden and Cairo was issued recently by the Canadian committee of the Save the Children Fund.

In addition to the number now being given shelter, thousands more stream into Cairo and Sweden every week. Babies and children are in rags. Some of them are not that fortunate.

Any woman in Canada who helps a stricken European mother aids in building a bridge of friendship that will do much to unite the old and new worlds in a tie of co-operation for world peace.

Four Canadian women's organization who have already adopted the project are the League of Nations Society in Canada, Ontario Federation of Home and School, Provincial Council of Women for Ontario, and the National Council of Jewish Women.

Kits are required for newly-born infants, babies from six to 18 months, and boys and girls from two to three and from four to five. Knitting wool and knitting needles, as well as any scraps of left-over material, will also be greatly appreciated.

Each kit is to carry the age and sex of the child for whom it has been prepared, as well as the name and address of the donor, so that the mother receiving it will be able to express her appreciation.

Right behind the fund's Canadian committee are the Benevolent and Protective Order of Elks of Canada and Newfoundland, who have contributed more than \$60,000, especially earmarked for British children who have suffered because of the war. The Elks plan to continue the support of these children for an indefinite period.

Instructions on making the much-needed kits for young European refugees will be gladly supplied, upon request. Donations to further the work are appreciated. Address your inquiry or donation to Scott Montgomery, secretary, Save The Children Fund, Canadian Committee, 18 Toronto Street, Toronto, Ontario.

## ORIGIN OF THE CHRISTMAS SEAL

Einar Holboell, a Danish postal clerk, first conceived the idea of holding a charity seal campaign in the year 1904. The first year nearly four million seals were sold and all the money raised was used to aid tuberculous children. In 1907, three years later, the idea for Christmas seals spread across the ocean to this continent and in Wilmington, Delaware, Miss Emily Bissell, who was then vitally concerned in trying to aid tuberculous patients, decided to design a seal bearing a "Merry Christmas" greeting and see if she could not obtain funds through the sale of them. This scheme proved very successful and the first year something like \$3,000 was raised. The following year the sale was conducted on a national scale in the United States. Seals were first sold in Canada in the year 1908, but it was not until 1927, under the direction of the Canadian Tuberculosis Association, that the campaign was organized on a nationwide scale.

Last year over \$40,000 was raised in Alberta, and present indications are that this will be greatly increased this year.

Word was received recently by relatives in Blairmore from Walter Howe, a vet of the last great war and who since for many years has resided near Washington, DC. Walter has been at the office of the combined chiefs of staff, but is now transferred to the office of munitions and supplies (Canada) in Washington. He met Miss Nancy Plytko, of Bellevue, who is also on the same staff. Miss Marion Bell, of Medicine Hat, is also there with the war information board in the same building. There are several persons there from Calgary and Edmonton. Walter sends his best regards to old friends, including Fishing Bartlett.

WORLD HAPPENINGS  
BRIEFLY TOLD

Alberta honey production has increased from 1,000,000 pounds in 1935 to 5,000,000 pounds in 1944.

King George VI has promoted his younger brother, the Duke of Gloucester, to general in the Army and air chief marshal in the R.A.F.

Germany was estimated to have taken the equivalent of 18 months of France's total production during the 50 months of Nazi occupation.

Residents of Northmore Green recently ate up a 70-pound cake—an exact model of their church which commemorated its 100th birthday.

The destroyer Nilam, a gift to the Royal Australian Navy from Britain, arrived at an Australian port after a year with the British eastern fleet.

A stained glass "window to womanhood," believed to be the first of its kind in Britain, has been unveiled at All Saints' church, Cambridge.

A trip across the Atlantic cost just \$10 for Frank O'Neill, 17, of Hamilton, Ont. That's the fine he paid at Halifax for stowing away in Britain on a Canada-bound vessel.

Britain's temporary postmen who in the past have had to provide their own waistcoats and dye their regulation blue, in future will have them issued by the government.

A Reuter despatch says the Germans have increased their production of poison gases during the past few months and now have 500,000 workers manufacturing it in 70 different factories.

## Christmas Cake

Ingredients Are All Here Ready For The Baking

The cake at this year's Christmas dinner will be the old-fashioned, rich kind only mother can make.

Reporting that Christmas cake ingredients are in good supply this year, the Prices Board gave the good word to cooks to get out the mixing bowl, for unless the cake is baked right away it won't have time to season properly.

Storehouses halfway around the world are sending Christmas cake ingredients dear to the hearts of every cook.

Raisins are arriving daily from Australia, spices from Granada, B. W. I., Ceylon and Zanzibar, peel and walnuts from the United States and other nuts from Spain, Portugal and Mexico.

Currents—traditional Christmas cake fruit—are in the stores.

Housewives can expect a special prayer of gratitude to the Royal Canadian Navy and the merchant navy for getting the goodies here safe and sound despite the submarine menace and shipping difficulties.

## Drove Train Slowly

Belgian Engineer Taking Hostages To Germany Defied The Nazis

Shortly before the entry of the British forces into Brussels, the Germans took two thousand hostages among the resistance movements. The train which was taking the hostages to Germany, however, was driven by a Belgian engineer who, in spite of all German threats, contrived to proceed much more slowly than the British armored columns. Finally the train stopped, and the 2,000 hostages were rescued.—News from Belgium.

## T.B. Ravages

More Canadians Killed By Tuberculosis Than By War

Dr. G. C. Brink, director of tuberculosis prevention for Ontario, said that more Canadian have been killed by tuberculosis since the beginning of the war than have been killed by the enemy in all theatres of war.

In an address to the Canadian Public Health Association, he said 28,891 patients died of tuberculosis from Sept. 1, 1939, to June 30, 1944; that the total of dead, presumed dead and missing in Canada's armed services was 25,315.

"Given the personnel and equipment, one has reason to hope that the mortality from tuberculosis can be cut in half in the next 10 years and the irreducible minimum reached," said Dr. Brink.

Eggs bound for desert areas are now being treated with a hot mineral oil bath which is said to preserve them for 45 days.

The oldest known standard of length—the cubit—was the distance between a man's elbow and the tip of his middle finger.

**HELL'S GATE:** This view of the million-dollar fishways project at Hell's Gate shows: (a) Construction camp straddling C.P.R. main-line tracks. (b) Scene of main blasting for fishways. (c) Entrance of tunnel being bored through solid rock. (d) Men drilling to open another passage for salmon. (e) Power shovel clearing away debris of old slide which destroyed protective eddy and caused barrier to salmon run.

## SUNDAY SCHOOL LESSON

NOVEMBER 26

## THE CHRISTIAN VIEW OF INDUSTRY

**Golden text:** Let him that stole steal no more: but rather let him labor, working with his hands the things that are good, that he may have whereof to give to him that hath need. Ephesians 4:28.

**Lesson:** Deuteronomy 8:1-20; Luke 12:13-34; 19:11-27; Acts 19:23-28; Thessalonians 4:11, 12; II Thessalonians 3:10-12.

**Devotional Reading:** Proverbs 31:10-20.

## Explanations And Comments

**It Is God That Giveth thee Power to Get Wealth,** Deuteronomy 8:11-20.

**Faithfulness in Industry,** Luke 19:11-28. Jesus begins his Parable of the Pounds with the statement that a certain nobleman went into a far country to receive for himself a kingdom. Calling his servants, he gave to each a pound and bade him trade therewith till he returned. He did not give them money in different amounts according to the ability of each, as in the Parable of the Talents, for he was not testing their ability, but their faithfulness, their diligence. A "mina," translated pound, is equal to one hundred "drachmas"; "drachma" was a coin worth about eight pence, or sixteen cents, Revised Version. The sum was small, but it would be sufficient to test their faithfulness. "Trade ye herewith till I come," was the direction the master gave his servants. In the interpretation of the parable, the nobleman is the Lord Himself, and to him the statement in verse 14 refers.

On his return, the nobleman calls for a settlement with his servants to learn how faithful they have been to their trust. To the one who had gained ten pounds and the one who had gained five pounds the master's commendation is the same. One there is who has kept his pound laid in a napkin, and who attempts to excuse himself by attacking the character of his master. "Thou takest up that which thou sayest not," said the master, "thou didst not sow" were probably provocation, and they mean here that the servant accuses his master of being an eater man who would require him to make up whatever loss there might be in trading, and would keep whatever profit he might make, so that he himself would be no better off for all his labor and trouble.

"It is a very old human fallacy to attempt to defend our own delinquencies on the ground of faults, real or fancied, which we see in others. A very fine touch in the whole story is that the master does not defend his own character at all. After all, his treatment of those who had worked with industry and faithfulness is all the defense his character needs." (Lynn Harold Hough).

## Former Editor

Geoffrey Dawson, Of The London Times, Is Dead

Geoffrey Dawson, 70, editor of the London Times for two periods, 1912-19 and 1923-41, is dead.

As editor of the authoritative Times, often the voice of the British government on matters of high international importance, Mr. Dawson probably was the most influential journalist in Britain.

He was educated at Eton and Oxford University and at the end of the last century became an official at the colonial office. From 1901-1905 he was private secretary to Lord Milner in South Africa, and then for five years edited the Johannesburg Star.

He was a former secretary and trustee of the Rhodes Trust.

## USING OLD TRICK

The Germans are using on the Western Front the piano wire trick they first pulled in Italy. The wire is stretched tightly across roads at just the right height to decapitate soldiers speeding by in jeeps. Troops reported one, far behind the front lines, probably was put up by pro-Nazi civilians.

The Kukuemam waterfalls in British Guiana, are the highest in the world, rising to a height of 2,000 feet.

## Automatic Gun Sights

Successful In Shooting Down Attacking Enemy Planes

The United States Navy disclosed that automatic sights keeping guns aligned on fast moving targets are a part of the answer to success in shooting down attacking enemy planes.

The sights, operated on a gyroscopic principle, the navy said, originally were used on smaller guns. Subsequently they were added to equipment of larger anti-aircraft guns and:

"This move enabled U.S. ships to reach out and blast the enemy planes even before they could get into their attack run."

The navy disclosed that in addition, "a revolutionary new sight based on the same gyroscopic principle is now in production by the navy for use in army and navy planes."

## Many Homeless

Four Million People In Europe Will Require Food And Shelter

In Europe as a whole, without Germany or Russia, there are now estimated to be 40,000,000 homeless. They will require food, shelter, medical supply and care, reorganization for resumption of useful activity, social reorganization, and financial and technical help. This indicates merely one phase of the enormous problem of reconstruction facing the United Nations after hostilities end. Yet without undertaking this huge program, and bringing it to a successful issue we can expect no lasting peace.—London Free Press.

## Received Her Stick

But Girl From Virginia Got It The Hard Way

Well, sir, it seems that a Southern young lady arrived here to study singing and found herself a mighty cuss room up on the West side which was ideal except for the fact that the window wouldn't stay open. It was the kind of window you have to prop open with a little stick. Our heroine looked around for several weeks without finding a little stick, and finally she wrote back to Virginia and asked to have one sent to her. It arrived the other morning, by parcel post, and now the window stays open.—The New Yorker.

## INTERESTING DISPLAY

Displays showing how camouflaged is made, how specially built paper bags can resist rain, how field rations are packaged, and what a porcelain pipe does under pressure were just a few of the exhibits at the National Chemical Exposition held at Chicago. At least 27 companies showed their latest developments in chemical science.

## JAPS ATE HORSES

On invaded Leyte in the Philippines, the Japanese fortified a 1,400-foot peak up which they had to bring equipment by pack horse, George Forster, NBC correspondent, reported. "When they were isolated by the American drive," Forster said, "the Japanese ate their pack horses."

Cats' whiskers have very sensitive nerves at their roots, making them invaluable as a guide in the dark.

## THIS CURIOUS WORLD

By William Ferguson

THE DOME OF NEBRASKA'S FIRST STATE CAPITOL BUILDING REPOSES ATOP A BARN NEAR GARLAND, NEBR.

IN THE UNITED STATES, DOMESTIC QUARRELS CAUSE THREE TIMES AS MANY KILLINGS AS GANGSTERS.

ANSWER: "Old Hickory," Andrew Jackson; "The Millboy of the Shakes," Henry Clay; "The Commoner," William Jennings Bryan; "The Children's Post," Henry Wadsworth Longfellow.

## REG'AR FELLERS—Building Up An Account

## Will Not Work

Unlucky Fishermen Cannot Use Nasty Worm As An Excuse

A farmers' bulletin of the Department of Agriculture says that worms, which most persons regard as the epitome of silence, emit a wee noise. About a dozen put together can make a snapping sound just audible to a normal human ear. Some fast-thinking fishermen may think that here's a brand-new alibi. ("Doggone worms kept snarling at the fish . . . scared 'em off.") It won't work, Waltons. A fish has a good sense of touch, and fair eyesight but his hearing is worse than that of an uncle about to be touched for a \$10 loan.—Chicago Sun.

## GOOD WHITEWASH

He was once the black sheep of the family.

When he had won success he presented himself at home again. He told his father how Fortune had smiled on him; he was earning up to \$150 a week.

"What a week!" cried his father. "A week," was the reply. "Then come inside," said dad. "The family can stand a lot of disgrace for that."

India has 38 cities with a population of more than 100,000.

## Hers To Hold

This dramatic photo shows a native Filipino woman as she came through the 96th Division lines on Leyte Island, carrying the family cross clutched to her bosom.

There are about 2,000,000 square miles of arid country in China.

OUR COMPLETE  
SHORT STORY—

## PRISON OF MARRIAGE

By MARCIA DAUGHTREY  
McGraw-Hill Newspaper Syndicate

They met at the Barklows' party on Friday night and they fell in love with such headlong intensity that both were completely astounded—and somewhat frightened.

On Saturday Jay and Chugi (short for Portugal) were a pair of incurably globe-trotting parents) drove into the mountains on a two-week picnic and spent most of the day simply staring into each other's eyes. On Sunday they went to church and afterward drove down to the beach for a swim.

"I've never felt like this before in my life," Chugi admitted breathlessly. "What has become of my fine emancipation, I'd like to know!"

Monday night they dined together and discovered that they enjoyed identical tastes in food; Tuesday night they went to a concert and approved the same symphonies.

Chugi said, "When two people fall in love like this they have to be careful not to sacrifice their individualities."

And Jay agreed. "The most satisfying marriage is that in which each partner preserves the freshness of his viewpoint."

On Wednesday each anticipated the other's every action and word.

On Thursday they were married and Chugi said seriously, "We mustn't settle down just to be Jay Elder and echo, or Chugi Elder and shadow. That's what will happen unless we're very, very careful. We think alike, we talk alike, we share every mental quirk. So there's one thing we must do: we must have separate duties. Every Wednesday night will be dedicated to the preservation of our independent personalities."

"Sounds like a sound policy to me," Jay lied easily. "No questions asked afterward, either. Wednesday night will be a closed day between the Elders, husband and wife."

"Right. Let's shake on it." Jay leaned forward. "This is my way of sealing a bargain," he said, thinking that nature must have been in a divine mood the day she ran Chugi's garden-petal skin, her dark-leaved blue eyes, and her incredible cooped hair through the infant assembly line.

They told everyone about their Wednesdays. There were those who laughed, and those who frowned, and those who telephoned Chugi or Jay and said how about counting me in on your holiday-from-matrimony evening?

Jay, who had been brought up by a mid-Victorian aunt, shook his curly head at the telephone and said laughing, "Thanks for the bid but I'm already booked for three weeks. Then he went to a movie alone, or took a male client out to dinner, or browsed through the old book shops down on Olive Street. Jay, as a smart construction engineer, knew when he had precisely what he wanted.

And so did Chugi. But she was a restless soul. In addition to that she was appalled by the closeness that marriage knit between two human beings. She was being genuinely honest when she insisted that her separate dates were only an attempt to keep from feeling stifled.

Wednesdays continued to give her a sense of freedom until one night she met Strong Baxter. She was window shopping with Ellen Kitt and, turning suddenly, they collided with him. "I beg your pardon," he said, jerking off his hat. And then, grinning with intense pleasure, "You're George Kitt's sister, aren't you? He had your picture on his dresser. He and I bunked together."

It turned out that this bronzed, six-foot stranger had worked on an oil project in South America with George Kitt, and that he was vacationing in the States. "I've been plenty lonely. I don't know a soul and my address book in Bogota by mistake," he explained, devouring Chugi with his eyes.

They went to the Coco Tree to dance, and Chugi discovered that Strong Baxter danced as well as Jay, and his laugh was as pleasant, and that his dark eyes were capable of flashing signals that made her tremble. When he asked her to spend the next day with him, Chugi explained that she was married. "But I'll save next Wednesday evening for you," she volunteered, going into detail about her pact with Jay.

They went to the Coco Tree to dance, and Chugi discovered that Strong Baxter danced as well as Jay, and his laugh was as pleasant, and that his dark eyes were capable of flashing signals that made her tremble. When he asked her to spend the next day with him, Chugi explained that she was married. "But I'll save next Wednesday evening for you," she volunteered, going into detail about her pact with Jay.

"You mean you and your husband have separate dates?" When she glanced up Chugi found contempt and calculation in a man's gaze. "One of you is a great fool," he observed quietly. "I think after this dance we should leave."

Chugi was careful to muffle her tears against his pillow. Tomorrow, she promised herself, she'd explain to Jay that she was willing to give up her Wednesdays.

It was a grudging concession until she caught a glimpse of the society lady in the morning paper. "There was an enormous picture of Jay beaming at some starchy-looking creature over a night club table. 'Famed Woman Explorer Discusses results of Latest Expedition With Friends,' read the caption. There followed a story about the beautiful and gifted expert on Inca ruins, and her fascination for very modern men."

Handing the paper across the breakfast table Chugi said slowly, "Jay, I don't feel that our separate dates should be continued if you intend to humiliate me like this. After all, marriage is a sanctuary to share, not a prison from which to escape."

Jay studied her for several moments, his eyes shining. "Darling!" was all he said. He decided there was no point in admitting that the lady explorer had been a little confused, and had sat down at his table, quite by mistake, to be photographed.

DIET

This 20-page booklet  
every woman will want...

The new Kellogg's "Weight Control Plan" gives you vital facts on menu planning and how to control your "ideal" weight. Scientifically prepared weight-control menus (at three calorie levels) for every day in the week. Prepared by competent authorities, this booklet can help you and your husband look your best, feel your best.

You will find the new Kellogg's "Weight Control Plan" packed inside the top of every package of Kellogg's All-Bran—the delicious food that aids natural regularity. Get your copy at your grocer's now.

**Has Many Uses**

Plastics Are Playing A Leading Role In The War

From coal, air and water; from cow's milk; from limestone, natural gas and salt; from wood and acetic acid, among many other sources, come plastics. And the uses of plastics are legion.

Before becoming periscope housings, warplane windshields, army badges, and buttons, or any of tens of thousands of parts and articles now produced synthetically, plastics are in powder form. Squeezed into moulds under tremendous pressure and at a high temperature, the powder undergoes great physical change and emerges as the finished article or part.

Not only as substitutes for such scarce materials as metals, rubber, and silk, but also as a means of speeding up the production of complex shapes and parts, plastics are being used so extensively nowadays that some are almost as scarce as the materials they are intended to replace.

Others Will Carry On  
Japan's Black Dragon Society Will Replace Leader Who Died

The death of Mitsuru Toyama, founder of Japan's Black Dragon Society, will not end this villainous organization. Another leader will take over its 10,000,000 fanatical "patriots."

Called Japan's "unofficial emperor," Toyama was more powerful than Hirohito. A foe of foreigners, an advocate of unlimited world expansion by his country and the fingerman for a desperate following, he removed opposition by bullet or bomb.

The Black Dragons work in the dark, with deadly aim and persistence. Any country that occupies Japan after the war will have to reckon with this hidden power. Government by assassination is in the Jap's blood and tradition.—Detroit Free Press.

**SORE LIMBS**  
**SORE ACHING MUSCLES**

Buttercotter Biscuits  
1 cup All-Bran  
1 cup buttermilk  
1/4 cups flour  
1/4 cup shortening  
1/4 cup baking powder  
1/4 cup soda  
1/4 cup shortening

Soak All-Bran in buttermilk. Stir flour, baking powder, salt and soda together. Add shortening until mixture is like coarse cornmeal. Add soaked All-Bran. Stir until dough follows fork around bowl. Turn onto floured board, knead lightly a few seconds. Roll dough into an oblong about 4 inch thick. Spread with 1 tablespoon soft butter and sprinkle with 1/4 cup brown sugar. Roll up like a jelly roll. Cut into 1-inch slices. Place slices cut-side down close together in greased baking pan. Bake in hot oven (450 degrees F.) about 12 minutes.

Yield: 12 biscuits (2 1/4 inches in diameter).

**Church Supper Surprise!**

If anyone knows you've included a half-dozen toothsome Buttercotter Biscuits in your box for the church supper, you may be sure the box will bring a pretty penny to sweet charity... and pretty compliments in your direction.

**BUTTERCOTTER BISCUITS**  
1 cup All-Bran  
1 cup buttermilk  
1/4 cups flour  
1/4 cup shortening  
1/4 cup baking powder  
1/4 cup soda  
1/4 cup shortening

Soak All-Bran in buttermilk. Stir flour, baking powder, salt and soda together. Add shortening until mixture is like coarse cornmeal. Add soaked All-Bran. Stir until dough follows fork around bowl. Turn onto floured board, knead lightly a few seconds. Roll dough into an oblong about 4 inch thick. Spread with 1 tablespoon soft butter and sprinkle with 1/4 cup brown sugar. Roll up like a jelly roll. Cut into 1-inch slices. Place slices cut-side down close together in greased baking pan. Bake in hot oven (450 degrees F.) about 12 minutes.

Yield: 12 biscuits (2 1/4 inches in diameter).

**Seed Testing**  
Purity Of Analysis And Making Of Germination Tests

Seed testing, as applied to laboratory work, is a general term which is used for two phases of the seed analyst's work, namely purity analysis and the making of germination tests. Modern seed testing is a highly technical job requiring much training, botanical knowledge, good judgment, and last but not least in importance, endless patience. At certain seasons, laboratory staffs are overwhelmed with work. Registered and certified seed growers have to get their seed passed sooner or later by the Plant Products Division, Dominion Department of Agriculture. But many seed growers like to have it done later.

As pointed out by W. H. Wright, Chief, Laboratory Services of the Division, this late sampling, causes serious congestion in the laboratories with resulting delays, because there is a limit to the number of staff that may be employed and to the equipment available. By having their seed cleaned and ready for sampling early in the winter rather than in March and April, seed growers can assist in speeding up the work in the laboratories. In fact, the laboratories would like to receive many more samples before Christmas than is usually the case.

The object of the Seeds Act of Canada is to set up a yard stick for the evaluation of seeds to produce crops, and the regulations are made in such a way that they will be fair and just to the producers and vendors of seeds and to the farmer who purchases seed to produce crops. The points of view of the seller of seed and that of the purchaser are different. Both have to be considered, and in this consideration the work in the seed testing laboratory is to report the crop-producing value of seed as accurately as possible.

Canada is fortunate, says Mr. Wright, in having one Dominion-wide law and seed laboratories which are under one administration and uniformly equipped.

They Knew How  
British Engineers Did Remarkable Job In Record Time

British engineers have done many remarkable jobs during the war, but a job that was really a peacetime necessity was undertaken recently that merits the admiration of engineers in general.

Outside London Bridge station on the Southern Railway is a large and busy cross-over. The time had come when it needed to be rebuilt to carry the heavy traffic that these lines imposed upon it. The company's engineers put on their thinking caps. Outside the shops about five miles away in a field. The engineers laid out the ties on this field, fashioned the rail lengths and pieced the whole thing together. Every casting weighed a ton and every tie was marked with chalk. When this was done the whole thing was taken to pieces and loaded on flat cars in the exact order in which it would be needed.

One morning at 6:30 a gang of men set to work to tear up the old cross-over. A small army of men in different categories of engineering were on the spot. At five o'clock in the evening the entire cross-over was laid and traffic was resumed.—St. Thomas Times-Journal.

**Canada's Top Ace**

Exhibition At Plovidally Showed People How It Was Done

For the first time since the buzz-bomb raids began Londoners have seen how the menace was countered through an exhibition at Plovidally.

Though secret defence weapons, radio-location apparatus, rocket anti-aircraft guns and scale models of the latest jet-propelled fighters were removed by security officials a few hours before the exhibition opened, it still gave civilians a rough idea how the Royal Observer Corps, A.A. batteries and fighter and balloon commands protected them.

Some of the exhibits had been displayed before during war savings drives and Wings for Victory Week but one new one was the "balloon parachute cable," used to cut the wings from flying bombs and controlled by W.A.A.F. girls on the ground.

The device comprises two parachutes attached to a moored balloon and connected by a steel cable. When a buzz-bomb nears, the operating W.A.A.F. presses a button, releasing the parachutes so they drift down into the bomb's course.

Some persons are blessed with a spirit of humility; others seemingly have to have it thrust upon them, often to their secret hurt. Among the ironies of this war is the way events have at times produced humbling situations, struck at overweening pride, and, oddly enough, have revealed human worth where it was not always expected to reside.

There is a little thoroughfare in Toronto named McGee street. It was probably not well known, but it is rapidly becoming so and deserves to be. Toronto should be proud of it, and probably is by now. McGee street lies in that vague region which a shallow snobbery has been too quick to designate as "on the other side of the tracks." Those are fighting words, brother, and remembering the cool advice of the Virginian, one had better smile when he utters them. Safer still, do not use them at all.

In seeking to relieve the acute housing situation in Toronto, its civic officials arranged to have temporary homes placed on McGee street for the families of service men. The first house had no sooner been erected when protests were raised. The site was objected to as being quite unsuitable for soldiers' families; McGee street was declared, in fact, to be "a slum area."

That was too much for the residents there. Their spokesman, President George F. Dickinson, of the Veterans' Guard, makes it known that from the 68 houses on this little street have gone no fewer than 73 men to perform active service in this war. Four have been killed in action, two others are amputation cases. Among those serving are two majors, a captain and two sergeant-majors; all the armed services are represented including paratroopers.

McGee street is in this war with everything it has. It has given its best. Its modest homes may lie close to a railway embankment, but it is no slum. What Canadian street of similar size can excel its war record?—Hamilton Spectator.

**Given Its Best**  
Small Street In Toronto Has Reason To Be Proud

Some persons are blessed with a spirit of humility; others seemingly have to have it thrust upon them, often to their secret hurt. Among the ironies of this war is the way events have at times produced humbling situations, struck at overweening pride, and, oddly enough, have revealed human worth where it was not always expected to reside.

**Canadian Army**  
Our Fighting Men Stand Higher Than Ever In Britain

Canadians are enjoying a "tremendous popularity" in Britain these days following their work in clearing out buzz-bomb sites and cross-channel gun emplacements, William Stewart, Canadian Press war correspondent, said on his return to Canada after three years of covering Canadian advances in Sicily, Italy, France and Belgium.

"Stories about the Canadian army have been headline news in British papers for several weeks," he said. "The result is that the reputation of the Canadian fighting man stands higher than ever in Britain."

**BETTER THAN PARACHUTE**  
A device known as a "sky hook" drops supplies of food, medicine, and mail from cargo planes to military personnel in isolated spots. It is better for the use than a parachute, since in ordinary winds it will land almost directly beneath the point of release.

**One-Yard Pattern**

Here's news—an apron from only one yard of fabric. Pattern 4725 is pretty enough for Christmas gifts. Scarves, hand pockets add appeal.

Pattern 4725 comes in sizes small (14-16), medium (16-20), large (40-42). Small size takes one yard of 35-inch material.

Send twenty-cents (20c) in coins (stamps cannot be accepted) for the pattern. Write plainly Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man. "Because of the slowness of the mails delivery of our patterns may take a few days longer than usual."

**RUBBER LIKE MILK**  
Sap of the rubber tree not only looks like cow's milk, but acts so much like it that chemists learned a great deal about handling it by studying the methods of dairy chemists, and even the name "latex" comes from the Spanish word for milk.

Blaimore - Alberta

**Local and General Items**

The hen is the only bird that can produce just by sitting around.

Lt-General H. D. G. Creer has been promoted to the rank of full general.

Mrs. "Billy" Royle, of Kitchener, Ontario, is house guest here of Mr. and Mrs. Ed. Royle.

Residents of a cemetery in south-eastern Alberta have formed a company. More graft, maybe.

A truckload of Christmas trees from British Columbia passed east through Blaimore yesterday.

Clarence Woodward and William McMillan Alexander, of Bellevue, have been appointed notaries public.

EYES EXAMINED—Glasses filled, at Blaimore Pharmacy, Sat., Dec. 2, E. J. ANDERSON, B.Sc., attending.

The poorest indication of a snow-storm nowadays is to see a person carrying a pair of skis along the street.

Sigmn. M. C. Blanchard, of the Royal Canadian Signals, is spending a two-week furlough at his home in Blaimore.

Some people in the Crows' Nest Pass would be somewhat satisfied if they could see but an indication of snow.

Robert E. Gard, of the University of Alberta, is endeavoring to secure copies of Bob Edwards' Eye Opener for file purposes.

Monica Alexander, of Bellevue, has been appointed a commissioner for cats and process issuer, in place of F. J. Turner, resigned.

Mayor E. Williams, who had been under medical treatment in Calgary for some weeks, returned to town yesterday, feeling somewhat improved.

Thomas Robert Bremner, brother of Mrs. W. L. Shera, passed away in Lethbridge on Monday morning, aged 60. Joseph Bremner, of Macleod, is a brother.

Santo Romeo passed away in Calgary on Saturday, aged 56. A native of Italy, he came to Canada 38 years ago. Mrs. Angela Pugliese, of Natal, is a daughter.

Because of the finding of bubonic plague infested rats on Tacoma's waterfront, that port has been declared a plague-infested one by the U.S. public health service.

A new son has arrived to Sgt. and Mrs. George A. Kerr (nee Winifred C. Chesney, of Calgary) at the University Hospital, Edmonton. George was a former Blaimore boy.

An accused criminal smiled up at Lord Bacon, who as chancellor, was trying his case. "Your highness really ought to let me free. We're kin, you know, for my name's Hogg and Hogg's kin to Bacon." Dryly Bacon replied: "Not until it's hung!"

Pete Zoratti, of Natal, has purchased the W. R. Hull business block at Lethbridge. Two years ago he purchased the Coaldale hotel there, then the Ariel apartments, then seven valuable lots. Pete came to Canada from Italy in 1903, settling down in the Crows' Nest Pass as a blacksmith, which he followed till 1910, when he moved to Natal and built an hotel there.

Mr. J. R. MacLeod, the newly appointed successor to Mr. Frank Freeman as customs officer, arrived from Lethbridge on Wednesday and enters upon his new duties this week end. Mr. Freeman will be leaving shortly for his new station in British Columbia, to be joined there by his mother at a later date. During his term of residence here Mr. Freeman became very well and popularly known. Besides his regular duties, he was connected in official capacity with the Anglican church, the order of Elks and other activities, and will be greatly missed.

Following the line of least resistance makes rivers and men crooked.

The new apartments at the Napanee hotel at Fernie were opened last week.

Some folks do not know where a tail feather should be worn. They place it in their hat.

Tuesday of last week was the coldest of the season for the Fernie district, four above zero.

Life will be tougher for dad when peace comes. Mom and the girls can all say "Charge it, please?"

John Stokluk, vice-president of District 18 of the U. M. W. of A., spent the week end in this district.

Canada's Seventh Victory Loan sales totalled more than \$1,500,000 for an objective of \$1,300,000,000.

No one can demand that someone else be trustworthy; but everybody can become the sort of person other people trust.

Winnipeg district last week reported the longest sunless spell in more than twenty years. For fifteen days the sun did not show up.

Rfn. Albert Haluck, M31282, son of Mrs. Mary Haluck, of Coleman, was reported wounded in action last week end. He was with an Alberta regiment.

The fellow who boasts he runs things in his house probably means the lawn mower, washing machine, vacuum cleaner, baby carriage and errands.

The twenty-fourth annual roundup of Southern Alberta Old Times' and Pioneers' Association took place at the Palliser hotel in Calgary last evening.

Mr. and Mrs. Frank Nemirava and Mr. Tony Zak were down from Kimberley to attend the funeral of Mrs. H. Zak on Sunday. They returned to Kimberley on Monday evening.

We have just received word from M. Joyce, stating that he has at last settled down in Vancouver at 415 East 57. Mr. and Mrs. Joyce are feeling fine and wish well to everybody.

You can go down in Newfoundland and buy hockey boots, ski boots, women's and children's leather snow boots, ballet and tap shoes, and skating boots with skates attached, all free of ration.

We regret that in our last week's issue we through error referred to Mr. Andel having passed away some years ago. Mr. Andel is still very much alive, we are glad to say, and still able to follow employment.

Butter purchased with coupons 86 and 87 must last three weeks, until December 14th, when coupons 88 and 89 may be used. This is the second reduction in the Canadian butter ration in recent months, occasioned by shortage in stocks. Cancellation of one week's supply will save 5,000,000 pounds.

Eight days ago Mrs. George Bond, of Blaimore, underwent a rather critical operation in a Calgary hospital, and is reported doing well as expected. While in the city she is accompanied by her daughter, Mrs. Milda King, and her son, Corporal Maurice Bond. "Dad" is now busy housekeeping.

**Christmas Seal for Christmas Mail.**

Jean Marchant, of Blaimore, has opened a beauty parlor in Calgary, known as the New Trend, opposite the Western Canada High School.

An Edmonton report in the Calgary Alberta has it: "William Arhald, Blaimore farmer, has been chosen to contest the Macleod constituency in the next federal general election."

Army Chaplain Albert E. Larke, and Mrs. Larke, were visitors to this district during the week. Mr. Larke recently returned from overseas and is not yet sure as to whether or not he will return overseas or remain in Canada.

Slightly more than half the number of men discharged from the army forces in recent months have returned to their former occupations. In order to facilitate the re-establishment of veterans, special efforts are being made.

The marriage of Miss Jean Miller, second daughter of Mr. and Mrs. Fred Miller, of the Lundbreck district; to Tony, son of Mr. and Mrs. Joe De-Ceco, of Coleman, took place at Coleman on Saturday last, Rev. Father Sullivan officiating.

Down in Nova Scotia, probably the only part of Canada to experience such recently, heavy rainfalls were reported during the second week in November, with many roadways washed out. Alberta needs some of that stuff, but more moderately.

A new type of rescue boat, sturdy enough to be dropped from a plane by parachute from high altitudes, has been developed by Higgins Industries Inc., of New Orleans, and officials say several hundred are being rushed to completion. They can be dropped fully equipped to ship or plane survivors or castaways. They carry clothing, blood plasma, smoke signals, and rockets to discharge buoy lines.

**NEW JAVA SHOP OPENS**

The new Java Shop opens for business today in the premises previously occupied by P. Colombo, next east of the Cosmopolitan hotel, with Mrs. J. Riva in charge.

A thorough interior renovation, with booth changes, etc., make the premises most attractive.

Special attention will be paid to light lunches, ice cream, etc. See ad elsewhere in this issue.

**NOVA SCOTIA MINERS ASK WAGE INCREASE**

Formal application has been made to the National Labor Board at Ottawa by the United Mine Workers of America for wage increases averaging more than one dollar a day for 12,000 Nova Scotia miners.

The application is made in an effort to level the Nova Scotia rates with those paid in Alberta and British Columbia mines which, by one dollar increase awarded by a special commission last year, were brought up to an average of \$6.57 to \$6.78 a day. The same commission gave western miners two weeks' vacation with pay. The National Labor Board in a subsequent decision on an application by the Nova Scotia miners granted an increase of one dollar a day and one week's vacation with pay.

**The Government Liquor Control Act of Alberta APPLICATION FOR BEER LICENSE**

Public notice is hereby given that the undersigned intends to apply to The Alberta Liquor Control Board for a License to sell Beer by the glass or open bottle, for consumption on the licensed portion of the premises, and also to sell Beer by the unopened bottle for consumption elsewhere than upon the licensed premises, in conformity with the provisions of The Government Liquor Control Act of Alberta and the Regulations made hereunder, with respect to the following described premises:

Beer salaroom in the south-east corner of the ground floor of the Frank Hotel, situated on Lots 17 and 18, in Block 28, Plan No. 3661-1, Frank, Alberta.

Dated at Frank, Alberta, this 1st day of November, 1944.

STEVE BOBROSKY, Applicant.
